PROJECTS

WEATHER MONITORING SYSTEM USING REST API
(02/2023 - 05/2023)
- In this project we developed a Weather Monitoring System with a REST API using Python and Flask, integrating real-time weather data from external APIs like OpenWeatherMap and designed endpoints for retrieving weather forecasts of any searched location,

MySQL Ease (01/2024 - 05/2024)
- We developed a project on "MySQL Ease," an HTML web app simplifying database interactions with prebuilt queries. Users seamlessly input data, utilizing a Flask API in Python to integrate with local MySQL databases. This system streamlines operations, enhancing productivity and usability for database management tasks.
